Here are 28 very good keywords for your niche. All results are based on actual search terms related to your niche. If a term you like or think is good and does NOT appear here, it's because of low-monthly-search-volume or high-competition-levels. Multiple selection criteria with **NEW CROSS VERIFICATION OF TOP RESULTS** have been used to find them. All have extremely low competition levels and, with proper on-page and off-page SEO, you can rank for any of them.

personal power definition

Volume: 590/mo | CPC: \$0.00 | Competition: 0 |  ★

My first choice for you as a primary keyword for your main page – if content applicable – would be "**personal power definition**" because of relevance, volume, and lowest competition across all metrics. A top-ranked web-page for this keyword could get up to **249 hits/mo.** (42% of total searches).

I would also create more sub-pages with titles equivalent to other keywords on the list you like and SEO each one for each keyword. Done properly – with more top-ranked pages – can increase your total hits per month.
